Abstract (en)
[origin: WO2016040975A1] The invention relates to sealing systems of suction rollers which, in the interior, have at least one suction box (4) which is sealed laterally in relation to the lateral roller surface (3) by a respective sealing-strip system (1, 2), and each sealing-strip system (1, 2) comprises a sealing strip (1.1, 2.1), which is inserted in a sealing-strip holder (1.2, 2.2), wherein at least one lubricant feed is integrated in at least one sealing-strip holder (1.2, 2.2), and wherein, in the sealing-strip holder (1.2, 2.2), at least one opening (10) of the lubricant feed runs up to an outer side of the sealing-strip holder (1.2, 2.2), said outer side being located in front of the sealing strip (1.1, 2.1) , as seen in the movement direction of the lateral roller surface (3).
