Abstract (en)

[origin: WO2016043641A1] The disclosed invention relates to a house foundation system (1) comprising a foundation frame (10) for arrangement on an excavation bottom. The foundation frame (10) comprises a plurality of height-adjustable support members (12) which are adjustable for providing a leveled foundation frame on an uneven excavation bottom. The invention further relates to a method for forming a house foundation and a method for forming a floor structure (200).
