Abstract (en)
[origin: WO2016016203A1] The invention relates to a filling valve (1) for a toilet flush tank, comprising: (i) a body (2) in which there is formed a chamber (3) connected to a water inlet pipe (4) and to a pipe (7) for filling a flush tank in which an opening (35) forming an air inlet is made, (ii) a reservoir (30) disposed next to the opening (35) and designed to be filled during the passage of the water until the opening (35) is immersed and to be emptied and to free the opening (35) during the closure of the filling valve.
