Abstract (en)

[origin: WO2016042253A1] The present invention relates essentially to a method for archiving data (DATA) relative to a user equipped with an electronic apparatus (105) and having a user account on a server (103) comprising a database (104), characterised in that the method comprises the different steps consisting of: - transmitting (210) the data (DATA) relative to the user from an electronic device (110, 310) to the server (103); - storing (220) the data (DATA) relative to the user in a first container (108) of the database (104) of the server (103); - generating (230), by the server (103), a temporary reference (REFT) associated with the first container (108) of the database (104); - transmitting (240) the temporary reference (REFT) from the server (103) to the electronic apparatus (105); - accessing (250) the data (DATA) relative to the user from the electronic apparatus (105), a connection between the electronic apparatus (105) and the server (103) having been established previously.
