Abstract (en)
[origin: CA2961332A1] Inter alia, a method is disclosed comprising: receiving (300, 400) a first information item, wherein the first information item originates from one or more entities (11, 12) of an internal network (13), making available (301) the first information item and/or an information item based on the first information item, at least partially as a function of an assignment of an information type of the first information item and/or the information item based on the first information item to a first group of entities (31, 33) of an external network (34) in such a way that the first information item and/or the information item based on the first information can be obtained only by the entities of the first group of entities (31, 33) of the external network (34).
