Abstract (en)  
[origin: JP2017128121A] PROBLEM TO BE SOLVED: To provide a printer which can perform printing on a printing object to be used for marking of an electrical component, has a compact structure, and allows a user to perform an easy and user-friendly operation even in a case where the printer is not connected to an external computer.SOLUTION: In a printer, a housing includes a housing lower part 12 and a housing upper part 13, a printing space, a printing device, a storage device and a control and evaluation unit are arranged in the housing lower part 12, a tablet computer 14 is provided as an input and display device. The tablet computer 14 is attached so as to be turnable around a rotation shaft to the upper surface of the housing upper part 13 and can be locked at the upwardly-turned position. The housing upper part 13 is pivotally supported so as to be turnable around the rotation shaft to the housing lower part 12.SELECTED DRAWING: Figure 3
