Abstract (en)
The disclosure herein relates to a sealable drinking container operable to preserve the freshness, taste, nutrients and natural appearance of a smoothie / fruit and vegetable juice green drinks. The sealable drinking container comprises a container body and an upper cap assembly comprising an air-extracting device. The air-extracting mechanism is configured to use a sealable coupling mechanism to couple with the container body forming the sealable drinking container and further operable to extract air from the sealable space, thus operable as an oxygenation suppressing apparatus. The air-extracting mechanism may also be incorporated within an air-extracting chamber associated with the upper cap assembly and used with various types of containers.
