Abstract (en)
An impeller for a centrifugal compressor according to the present disclosure includes a hub (20) and wings (21). Each of the wings has a leading edge portion (24) and a body portion (25). A tip (35) of the leading edge portion and a tip (36) of the body portion extend from the foremost part of the hub toward the aftmost part of the hub on a side opposite to a side (37) where the wing is in contact with the hub (20). In a plan view of the wing seen from a radial direction perpendicular to an axis (O) of the impeller, a profile of the tip (35) of the leading edge portion (24) has a linear shape and a profile of the tip (36) of the body portion (25) has a curved shape.
