Abstract (en)
The system (1) for playing an on line live casino roulette game (21) with a human croupier (4), comprises a gaming table (2) provided with a roulette (21), sensor means (22) for providing, at each spin on the roulette (21), the information on which number comes out and video/audio acquisition means (3) for shooting a gaming zone that comprises the table (2). A processing system (7) is also provided, configured for managing the roulette game (21) and comprising a game interface (71) configured for allowing remote viewing of the gaming zone and for placing bets. The processing system (7) comprises: a storage module (72) configured for cyclically increasing the value of a jackpot; an assessment module (73) configured for checking if, in consecutive spins on the roulette (21), the numbers came out appear in at least one winning sequence and if at least one player has bet on all the numbers of the sequence; an evaluation module (75) configured for calculating the value of a payout corresponding to a percentage of the jackpot being a function of the winning sequence and of the value of the sum of that player's bets.
