Abstract (en)

[origin: WO2016046504A1] The invention relates to an arrangement (1) of a hanging storage element that can be mounted on the underside of the headlining (3) of a roof (4) of a vehicle and over the head of a passenger, comprising retaining means (2) and at least one container (10), characterized in that at least the container (10) is assembled laterally on the retaining means in a position of use in which it affords a storage volume under the underside of the roof (9) and an extracted position in which the container (10) can be carried around, when it is no longer assembled on the retaining means. The invention finds its application in the automotive field.
