Abstract (en)
[origin: WO2016046102A1] The invention relates to a method for controlling a braking device (1) of a rail vehicle, wherein the braking device (1) comprises a predetermined number of braking systems (3, 4, 5), and a first number of braking systems (3, 4, 5) which is smaller than the predetermined number of braking systems (3, 4, 5) is activated in a first stop braking operation state. The invention further relates to a braking device for a rail vehicle.
