Abstract (en)
[origin: WO2016046268A1] The present invention relates to a train warning device (100) for emitting a train warning signal to a motor vehicle, said signal indicating the imminent passage of a railway train through a level crossing. The device comprises a first communications interface (101), designed to receive a level crossing signal indicating the imminent passage of the railway train through the level crossing, and a second communications interface (103), designed to emit the train warning signal to the motor vehicle in response to the receipt of the level crossing signal.
