Abstract (en)  
[origin: CA2970631A1] The invention relates to a furniture hinge (10) with a stop (11) which is paired with a hinge cup element (50) comprising a hinge cup (52) and with at least one securing element, in particular a clamping jaw (72.1, 72.2) of a spreading element (72) or a securing pin (84.1, 84.2), for securing the stop on a piece of furniture. The furniture hinge also comprises at least one actuating element (40, 80.1, 80.2), which is operatively connected to the securing element, and a hinge arm (20), which is connected to the hinge cup element in a foldable manner via a joint connection. According to the invention, the at least one actuating element is arranged in the movement direction of the hinge arm so as to be moved from a first position to a second position by the hinge arm when the hinge arm is folded into the hinge cup. The furniture hinge can be assembled onto a piece of furniture without additional tools.
