Abstract (en)

[origin: WO2016046291A1] The invention relates to a heat exchanger, especially for a motor vehicle, said exchanger comprising a heat exchanger bundle for heat transfer between a first and a second fluid, said bundle comprising a plurality of tubes (2) and a header box (2), said tubes (3) and said box (2) allowing the circulation of said first fluid therebetween, said exchanger also comprising a plate (16) for holding said tubes (3), said plate (16) being attached to said box (2), said box (2) comprising a collector plate(6) provided with openings for the passage of said tubes (3), said collector plate (6) consisting of a plastic material. The invention also relates to a method for producing such an exchanger.
