Abstract (en)
[origin: WO2016045788A1] The invention relates to a method for anonymously making a transaction. In said method, one-time passwords encrypted using a one-way function are sent from an authentication server (12) to a service device (16). The non-encrypted one-time passwords are sent by the authentication server (12) to a secure element (10) of a mobile device. In order for a transaction to be made, the secure element (10) sends the one-time passwords to the service device (16).
