Abstract (en)

[origin: EP3199055A2] The present invention disclosed herein relates to a container for storing different types of contents, and more particularly, to a container for storing different types of contents which is configured such that liquid-type contents and solid contents are accommodated in one container body, and can be used by being selectively withdrawn through the upper and lower parts of the container body by means of the rotation of the container body, thereby facilitating portability and improving user convenience.
