Abstract (en)
A concrete cutting assembly (106) is provided having a motor on a support, the motor configured to be driven by a power source and having an output drive. A drive assembly is supported relative to the motor and has a drive input coupled to the output drive, and the drive assembly further has an assembly drive output. An interface is provided on the drive assembly configured to support a cutting blade so as to be driven by the assembly drive output and configured to support a chain saw assembly from the same interface when the cutting blade is removed and the chain saw assembly is driven by the same assembly drive output.
