Abstract (en)
Cooling box (1) for transporting heat-sensitive products, the cooling box (1) comprising: a thermally isolating cuboid housing (2) with at least one first (7) and one second storage chamber (8), wherein the housing (2) is closed on five sides by walls (9), and wherein the housing (2) comprises a commissioning opening (4) on an opening side (3), and a cover (5) to open and close the commissioning opening (4), the cover (5) containing an integrated cool pack (6), wherein the cooling box (1) comprises attachment points (12) for attaching at least one movable thermal isolation element (11) to a wall (9) of the cooling box (1). A cooling box (1) is provided, wherein a flexible thermal isolation allows for adjusting the temperature levels inside at least two storage chambers (7, 8) separately. This is useful for transporting goods with different temperature requirements, e.g. to costumers.
