Abstract (en)

[origin: EP3199895A1] The present invention refers to a cooling-freezing apparatus comprising at least one thermally insulated compartment for receiving goods that can be closed by a door or a cover, and particularly to a pressure equalising device with the cooling-freezing apparatus or said compartment. It is provided for according to the present invention that at least on one wall or at least in one wall of a case (3) or door (4) is arranged a device (7) for equalising pressure in a compartment (2) and, respectively, in a cooling-freezing apparatus (1), wherein a drying agent (9) is arranged inside the pressure equalising device (7).
