Abstract (en)

[origin: WO2016050659A1] The invention relates to a shoe sole (1) comprising: a sole bottom side equipped with a plurality of ground-contact zones (2); a sole top side designed to support the user's foot; a sole edge (5) defining the contour of the sole and extending along the entire side periphery of the sole between the sole bottom side and the upper of the shoe; and at least one zone provided with textures (10) creating a brightness contrast in relation to an immediately adjacent zone of the sole, said textured zone being provided on the edge (5) of the sole and/or on the edge of the tread designs of the sole.
