Abstract (en)
[origin: WO2016050941A1] In a table (1) with a height-adjustable table top (2) and support structures (3), the table top (2) is secured on the support structures (3) such that the support structures (3) support the table top (2). The support structures (3) can be placed on a floor. The table (1) comprises at least one band (4) which interconnects the support structures (3) and the table top (2), such that the table top (2) is supported by the support structures (3) since it hangs on the support structures (3) by means of the band (4). The table (1) according to the invention permits simple, convenient, quick and exact adjustment of the height of the table top according to the particular requirements of the person using the table (1).
