Abstract (en)
[origin: WO2016078926A1] The invention relates to a crane system (100) comprising a gas turbine (10) that has a manhole (20) on the outer housing (11) thereof, said manhole (20) being designed to open up a maintenance access to hot gas parts of the gas turbine (10) in the open state of the manhole (20), which is provided with a fastening section (25); the crane system (100) further comprises a hoisting mechanism (30) that includes a mating fastening section (35) which is connected to the fastening section (25) of the manhole (20) in such a way that the hoisting mechanism (30) introduces weights that same has to lift into the outer housing (11) of the gas turbine (10).
