Abstract (en)

[origin: WO2016050625A1] Lighting device (1), notably a lighting and/or signalling device for a vehicle, comprising a light source (4) positioned on a module (3) assembled on an optical device (2), the optical device (2) and the module (3) comprising first referencing means comprising: - at least one guideway (21) mounted on the optical device (2), said guideway (21) comprising an interior reference face (22) positioned facing an interior guide face (24), and - at least one extension (31) extending from the module, said extension comprising a reference bearing face (32), opposite to a contact face (33), said contact face (33) having at least one point of contact (P), the contact face (33) being arranged so that once the extension (31) has been introduced into the guideway (21) in a direction of introduction (OX), the contact face (33) bears at the point of contact (P) against the interior guide face (24) and that, locally, at the point of contact, the guideway (21) and/or the extension (31) undergo elastic deformation.
