Abstract (en)
[origin: WO2016051071A1] The system is characterised in that, the vehicle comprising a head-up-type display (34), said system comprises a gesture recognition device (26) that can supply data representative of a gesture made by the driver of the vehicle, and a control module (28) for processing the data, the control module (28) being designed so as to be able to control the display of at least one visual feedback (30, 32) on the display, upon reception of said data representative of the gesture made by the driver.
