Abstract (en)  
[origin: EP3202278A1] The present invention relates to a container for storing heterogeneous contents, comprising one container body for receiving first and second storage containers in which heterogeneous contents are stored respectively, wherein, as an elevation member slides vertically, one of the first and second storage containers is selectively withdrawn to the upper or lower part of the container body and the withdrawn storage contained can be used. Therefore, the container is easy to carry and provides improved user convenience.
