Abstract (en)

[origin: EP3202563A1] The invention relates to a machine for assembling cardboard boxes, with a feeding device for large-capacity sheets of cardboard. The feeding device (2) is adjustable and can be adapted to the different dimensions of the sheets of cardboard to be used. The plurality of sheets of cardboard are stacked vertically on drag chains and are supported on guiding means (10, 13) and on the upper part of a frame (3) from which said sheets of cardboard are individually sucked by means of a sucking mechanism (18). At least the device (2) for feeding the sheets of cardboard, the guiding means (10, 13) and the sucking mechanism (18) are interconnected by means of the frame (3).
