Abstract (en)
[origin: EP3202971A1] The present disclosure relates to a clothes care product (1) comprising a clothing support part (3), and a leg frame (5) arranged to support the clothing support part (3), which leg frame (5) includes a first leg (7) having a proximal leg part (7a) and a distal leg part (7b), wherein the proximal leg part (7a) is pivotally connected to the clothing support part (5) whereby a first pivot axis (11) is formed, and wherein the proximal leg part (7a) is pivotally connected to the second leg (7b) part thereby forming a knee-joint (8a) having a folding axis (13), a second leg (9) pivotally connected to the clothing support part (3), and which second leg (9) is pivotally connected to the distal leg part (7b) forming a second pivot axis (15), and a knee-joint locking member (17) immovably attached to only one of the proximal leg part (7a) and the distal leg part (7b), which knee-joint locking member (17) has a free end bridging portion that extends axially beyond the knee-joint (8a), and which free end bridging portion has a flexible tab, wherein the flexible tab has an inner surface provided with a protrusion that extends from the inner surface in a direction parallel to the folding axis (13), and which protrusion is arranged to prevent the first leg (7) in a fully unfolded position from folding.
