Abstract (en)

[origin: CN107061038A] The invention relates to a cylinder running surface of a cylinder of a reciprocating piston machine with depressions in the form of mutually spaced ridges (16), whereby plateaus (20) are formed between adjacent ridges (16), and plateaux (18) formed in the region of the plateaus (20) (18), and at least second plateau regions are formed with a second orientation of plateaux (18), the first orientation and the second orientation differing from each other.
