Abstract (en)

[origin: EP2733704A2] The method involves drying an object in a final disposal container (10) by heating inner side of the final disposal container and removing the formation of the moist air in the final disposal container during the heating. The object is dried in the final disposal container by vacuum drying. The openings (25,26) of the final disposal container is closable, particularly after drying of the object in the final disposal container, when the moist air is exhausted from the final disposal container by using vacuum. Independent claims are included for the following: (1) a final disposal container for a contaminated article; and (2) a method for the preparation of final disposal container for particularly a contaminated object.
