Abstract (en)  
[origin: CN107081716A] The invention provides a transportation device (300) for transporting driven tools (337, 337A) on the human body or on a tool (100), a tool (100) and a method for communicating between the tool (100) and the transportation device (300). The transportation device (300) comprises at least one accommodation device (330, 330A) for accommodatinh a predetermined driven tool (337, 337A) for the tool (100), and communication equipment (320) for transmitting a signal with information about the predetermined driven tool (337, 337A) to the tool (100) and/or for receiving a signal with information about the predetermined driven tool (337, 337A) from the tool (100).
