Abstract (en)

[origin: WO2016059294A1] This relates a lifter bar (1), method for making a lifter bar (1), a method for assembling a lifter bar and a grinding mill (3) for ore grinding. The lifter bar (1) comprises a lifter bar body (10) having an outer surface conforming the outer surface (1a) of the lifter bar (1), and a fixing element (11) for connecting the lifter bar (1) to the shell (2) of the grinding mill (3). The lifter bar body (10) further comprises a first portion (10a) and a second portion (10b) forming a continuous lifter bar body (10). The fixing element is embedded to the first portion (10a) such that it forms part of the fixing surface (1b) of the lifter bar (1). The second portion (10b) is made of polyurethane and forming 35 –85 % of the volume of the lifter bar (1).
