Abstract (en)

[origin: WO2016058679A1] The invention relates to an electronic brake system for a vehicle, comprising one or more electronic components, namely at least one electronic control device, as well as one or more devices for setting up a wireless communication. According to the invention, at least one of the devices for setting up a wireless communication is integrated into one of the electronic components or into a device containing one of the electronic components.
