Abstract (en)

[origin: WO2016058607A1] The invention relates to a device (10) for supporting a firearm or an optical device on the body of a user, said device (10) comprising a belt (16) that is to be fastened horizontally around the body of the user, to which a telescopically extendable support (24) is attached via a ball-and-socket joint (22), which carries at the distal end thereof a means (28) for propping up, placing or supporting the firearm or the optical device.
