Abstract (en)
[origin: WO2016059221A1] Modular shooting range comprised of a plurality of interconnecting units, said interconnecting units each constituted by an elongated shipping container, said interconnecting units comprising one front unit being at least substantially open at only one of the opposite long sides thereof, one bullet trap unit comprising a bullet trap system arranged for trapping bullets fired, said bullet trap unit being at least substantially open at only one of the opposite long sides thereof, a plurality of extension units for extending a length of said shooting range, each of said plurality of extension units being at least substantially open at both of the opposite long sides thereof, wherein said interconnecting units are connected to each other via said open long sides, and wherein said plurality of extension units are arranged between said front unit and said bullet trap unit thereby forming a substantially closed shooting range.
