Abstract (en)

[origin: WO2016058743A1] The invention relates to a pressure sensor (10) for sensing a pressure of a fluid medium in a measurement chamber (12). The pressure sensor (10) comprises a sensor housing (15), a first pressure sensor module (38) for sensing at least one first pressure of the medium in a first measurement chamber (12), and a second pressure sensor module (40) for sensing at least one second pressure of the medium in a second measurement chamber (13). The first pressure sensor module (38) and the second pressure sensor module (40) are arranged in the sensor housing (15). The pressure sensor (10) also has at least one first pressure connection (56), which is designed for connecting to the first measurement chamber (12). The pressure sensor (10) also has at least one second pressure connection (58), which is designed for connecting to the second measurement chamber (13). The first pressure connection (56) differs from the second pressure connection (58).
