Abstract (en)

[origin: WO2016060740A1] A processing device executing a registration service receives information identifying a first device, a second device and an application running on the first device. The processing device determines a registration technique that is supported by both the application and the second device and sends a message indicating the registration technique to at least one of the first device or the second device, wherein the application is to perform an operation associated with the first registration technique to bind the second device to the user account.
