Abstract (en)
[origin: CA2957690A1] The invention relates to a flushing station for a ring-pipe or series-pipe system (1), comprising a cold water port (19) for connecting a cold-water pipe (6), a hot water port (20) for connecting a hot water pipe (7), and a waste water port (21), wherein the cold-water port (19) and the hot water port (20) are fluidically coupled to the waste water port (21). The coldwater port (19), the hot water port (20) and the waste water port (21) are assigned to a bottom side (24) of the flushing station (13). The invention further relates to a ring-pipe system and a series-pipe system.
