Abstract (en)  
The present invention relates to a lighting device that comprises a first and a second light source (104, 105) arranged at a distance from each other, a reflector (102) for reflecting light emitted by the first and the second light source (104, 105), and switching means (302, 303) for switching the first and the second light source (104, 105) on and off independently from each other.
