Abstract (en)
[origin: WO2016062888A1] Packaging and application device (10), comprising: i. a container (11) containing a cosmetic product to be applied, ii. an applicator (12) for withdrawing the product contained in the container, comprising an application member (14) for applying the product, the container comprising a wiping member (20) for wiping the application member as it leaves the container, the wiping member comprising a flexible wiping lip (50) whose free edge defines an orifice for the application member to pass through, wherein the wiping lip deforms as the application member passes through the orifice, the wiping lip having in at least one transverse section at least two sectors which extend in angular fashion about the axis (X) of the orifice, and which are constituted of respective materials of different rigidities.
