Abstract (en)
[origin: WO2016063247A1] A rigid, hinged-lid packet (1) of smoking articles having: a group (2) of articles; an inner container (3) housing the group (2) of articles; an outer container (4), which houses the inner container (3) in such a manner as to allow the inner container (3) to move with respect to the outer container (4); a lid (9), which has a rear wall (13) hinged to a rear wall (7) of the outer container (4) to allow the lid (9) to rotate with respect to the outer container (4); and an actuating mechanism which moves the inner container (3) with respect to the outer container (4) using the rotational movement of the lid (9); the inner container (3) is smaller than the outer container (4), so as to define, inside the outer container (4), a chamber (24) adjoining the inner container (3).
