Abstract (en)  
[origin: WO2016062845A1] The invention relates to a device for receiving evaporation material, said device (1) comprising a receiving part (2) with a receiving volume (3), the device (1) having a head part (4) with an outlet opening (5), the receiving part (2) having a threaded portion (6) for mechanical connection to the head part (4), the head part (4) having a corresponding threaded section (7) for mechanical connection to the receiving part (2). According to the invention, the receiving part (2) is formed from pyrolytic boron nitride. The invention also relates to a method for producing such a device (1).
