Abstract (en)
[origin: WO2016062373A1] The invention relates to a toggle fastener (1) for fixing an object to a thin-walled component (24), comprising a beam (2) which has an opening (5) for receiving a screw, and a strip (3) that is connected to the beam (2) and serves for holding and positioning the beam (2) during the assembly. In order to be able to use such a toggle fastener in a solid building material, the invention proposes that the beam (2) comprises a screw channel (13) parallel to the longitudinal axis of the beam (L1).
