Abstract (en)

[origin: WO2016063222A1] A gas turbine unit including a combustion chamber provided with a plurality of burner assemblies and a supply system, configured to supply fuel to the burner assemblies. Each burner assembly includes a respective lance injector (20) having a plurality of first nozzles (60) and a first internal fluid line (58) fluidically coupled with the first nozzles (60). The supply system includes a first fuel supply line and an inert supply line, configured to respectively supply a primary fuel and an inert fluid to the first nozzles (60) through the first internal fluid line (58).
