Abstract (en)

[origin: WO2016062300A1] In a drier for industrial articles, in particular for painted motor vehicle bodies, comprising at least one booth for the industrial articles and for drying tools, the booth of the drier is formed by walls (5, 5') arranged at a distance from components near the outside of the booth (1) and other than the support feet (8) of the booth (1). This drier can keep the heat introduced into the booth longer, preventing radiation losses, in particular.
