Abstract (en)

[origin: WO2016062953A1] The invention relates to an electric machine (1) comprising at least one stator (2), the stator being formed by a body (21) and teeth (22) arranged on the inner face (221) of the body (21) of the stator (2), the stator (2) comprising at least one inner recess (24) formed in the body (21) of the stator (2), of any geometric shape allowing the mechanical stresses on the stator (2) to be limited.
