Abstract (en)  
The present invention is directed to a system and methods by which a garment (1201) may be accessorized. Preferred embodiments of the present invention include one or more mountable accessorizing apparatus which may be shaped and/or shapeable to form one or more mounting surfaces (151A,151) for mounting the mountable accessorizing apparatus on the garment (1201) and to provide one or more display components (171A,171) which may be viewable for accessorizing the garment (1201). Some embodiments may include attachment components (108) which facilitate mounting the one or more mountable accessorizing apparatus on the garment (1201). Attachment components (108) may include friction pads, magnets, pressure-sensitive adhesive, and/or hooks (114). The one or more display components (171A,171) may be viewable to accessorize the garment (1201) such as through color, pattern, and/or texture. In some embodiments, the system may include one or more supplemental modules which may supplement mounting and/or accessorizing.
