Abstract (en)

A device that can be fitted to beverage cans (7) which have a stay-on tab type opening. Said device is to be placed in the opening of the lid and consists of a main body (1) with a cylindrical or frustoconical outer shape, where the walls of said body have a non-uniform thickness, a hole (2) being located at the top thereof and another hole (4) at the bottom thereof, connected with each other so that said main body is hollow. Said main body (1) has at the bottom thereof a hollow space (6) of large enough dimensions to insert the tab (11) of the can (7); wherein at the bottom there is a fastening base (3) which has a semicircular recess (5) of equal diameter to that of the rivet (12) which secures the tab (11), and an opening of the same dimensions as the lower hole (4) of the main body (1).
