Abstract (en)
A closure device for waste collection bins comprising a support structure (4) rigidly engageable with the top of a containment tank (2) and a covering assembly (10) operatively borne by the support structure (4) to close the top of the containment tank (2). The covering assembly (10) comprises at least one covering element (11) having a proximal portion (11a) rotatably coupled to the support structure (4) and a distal portion (11b) movable about a pivoting axis of the proximal portion (11a), and at least one access door 813) rotatably coupled to the distal portion (11b) of the covering element (11).
