Abstract (en)
Drying oven for leather articles or the like, comprises a drying chamber (2) equipped with heating means (3) and having an inlet mouth (2a) and an outlet mouth (2b) and a conveyor (5) that goes through said drying chamber (2) and defines a mobile supporting surface (B) for articles (L) along a movement direction between the inlet mouth (2a) and the outlet mouth (2b). The oven further comprises an auxiliary transport unit (7) equipped with at least a support member (8), and movement means (9) associated to said support member (8) to move it along the movement direction, with a direction according or opposite to the conveyor (5), at a height above the supporting surface (B).
