Abstract (en)

[origin: EP3211505A2] The present invention relates to a control lever (1) enabling a multi-axis control by being fitted on a control lever base (2) and comprising a front handle section (6) suitable to be held by an user and capable of moving axially, a rear handle section (7) coupled with the front handle section (6); a plurality of switches (15) suitable to be controlled by the user and used as control elements, and at least one printed circuit board (18). Said control lever further comprises a front surface (30) arranged at the upper portion of the said front section (6) and a plurality of switch holes (31) provided on the front surface (30) and receiving a plurality of switches (15); at least one warning area (16), at the rear side of which there is located at least one light source (19); at least one printed circuit board housing (17a) in which at least one printed circuit board (18) is disposed, a wall (17b) extending into the control lever (1) integral with the said front surface (30), and a safety body (14) having a filler (20) which, when in use, at least partly covers its inner side in a sealing manner.
